Rationale

1. Students in this program come from diverse backgrounds and areas of study. They have needed to take MATH 203 as an equivalent statistics course for this Complementary Course requirement. MATH 203 already exists in the programs for six of the Science domains, and all three of the Arts domains.
2. It has always been the intent of the program that students could take courses from many areas, as long as they have a coherent program overall. We wanted to avoid having students take all their courses in one or two areas, so we specified three as a minimum, but some students took this to mean three areas maximum.
3. Course names and numbers changed associated with Faculty of Agricultural and Environmental Sciences program changes:
 - WILD 205 (3) Principles of Ecology – now: ENVB 305 (3) Population and Community Ecology
 - WOOD 410 (3) The Forest Ecosystem – now: ENVB 410 (3) Ecosystem Ecology
 - ENTO 440 (3) Systematic Entomology – now: ENTO 440 (3) Insect Diversity
 - SOIL 326 (3) Soil Genesis and Classification – now: SOIL 326 (3) Soils in a Changing Environment
 - NRSC 333 (3) Physical and Biological Aspects of Pollution – now: NRSC 333 (3) Pollution and Bioremediation
